

## 61001 Hydrocarbon Charging Kit Bottle Compatibility

The table below provides details on the Hydrocarbon Charging Kit bottle compatibility and corresponding valve O-ring configuration:

| Bottle Manufacturer                                      | Manufacturer P/N               | 61008 Bottle Valve O-Ring Configuration |
|--|--------------------------------|---|
| Enviro-Safe Refrigerants, Inc.                           | 8070 (R-600a Sealing)          | (2) O-rings                             |
| True Manufacturing Co., Inc. (with 61009 Bottle Adapter) | 969292 & 815869                | (2) O-rings                             |
| ICOR International                                       | R-290-14 & R-600A-14           | (2) O-rings                             |
| Chem Penn  | 111032 & 111034                | (1) O-ring                              |
| Mastercool Inc.  | 91050-290-12 &<br>91050-600-12 | (1) O-ring                              |
| Nu-Calgon  | 4175-20 & 4175-30              | (1) O-ring                              |
| National Refrigerants, Inc.                              | 014R290 & 016R600a             | (1) O-ring                              |

<sup>\*</sup>Bottles requiring piercing-style valves can be used with the kit but require the corresponding valve to be purchased with the bottle(s).
